

## EFFECTS OF FERTIACTYL GZ VS. VITAZYME ON CABBAGE

**RESEARCHER:**  
Tom Smith  
Timac Agro USA

**SITE LOCATION:**  
Monroe County, NY  
Cabbage

**PURPOSE AND HYPOTHESIS**

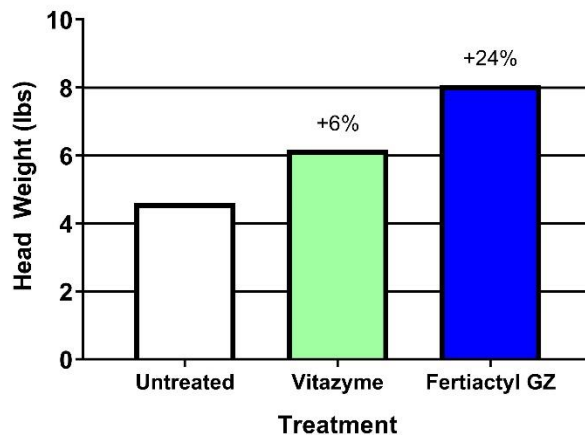

The purpose of this experiment is to test the proprietary liquid formulas on transplanted cabbage to improve establishment and increase yield. The hypothesis is the Fertiactyl complex will increase root length and improve establishment.

**APPLICATION**

PRODUCT	APPLICATION RATE	TIME
Untreated		
Vitazyme	2 qt/ac	At transplant
Fertiactyl GZ	2 qt/ac	At transplant

**RESULTS**

**Treatment Effects on Head Weight in Cabbage**

**GRAPH 1:** Average head weight in the three treatments.

**KEY FINDINGS:**

- Reduced stress of transplanting and increased root mass
- Increased quality and tonnage
- 24% increase in head weight over the control
