

TIMAC AGRO TECHNOLOGY

Our patented formulas are derived from nearly 60 years of research and development in plant extract technology. Through precise methods, our extracts are evaluated for their specific effects at each stage of crop development. By enriching selected extracts with macro- and micronutrients, we create bionutritional formulas that meet the ever-changing needs of the crop. Better yield and quality benefit our customers and are the result of improved emergence, vegetative growth, and reproductive performance.

As a company, our mission is to improve agriculture by focusing on four major areas of service to growers:

- Relentless innovation
- Flexible manufacturing
- Optimized applications
- Partners in the field

FEATURES

TiZn is a nitrogen, sulfur and zinc liquid, formulated with our patented Adur complex. TiZn supports early season plant growth, improves plant vigor especially during cool early growing conditions, and aids in plant uptake of other macro and micronutrients found in soils. The use of TiZn supports improved nutrient use efficiency and crop performance. Designed to blend into starter fertilizer or be tank mixed with early season post herbicide application, TiZn sets the stage for your crops to achieve top yields.

KEY BENEFITS

- Formulated with our Adur complex to improve nutrient uptake and absorption
- Supplies 5% zinc coupled with nitrogen and sulfur demanded by your crop
- Starter Fertilizer and Herbicide Tank Mix compatible, alternative to EDTA Zinc
- Formulation contains water conditioning and acidification components to support product performance

APPLICATION RATE

- 1-2 pts/ac

PACKAGING SIZE

- 2x2.5 gallon jugs
- 250 gallon totes

PRODUCT COMPOSITION

7-0-0-5Zn-4.5S
